

Creating sustainable energy solutions
through community service

www.energycorps.org

NCAT MISSION

National Center for Appropriate Technology
Helping people by championing small-scale,
local and sustainable solutions to reduce
poverty, promote healthy communities, and
protect natural resources.

ENERGY NEEDS IN MONTANA

- × Need: Montana communities need clean, affordable, sustainable energy.
- × Need: Individuals need education and motivation to proactively use energy more efficiently.
- × Need: Workforce needs training to meet demand for emerging market in green/clean energy.
- × Need: Non-profit organizations need added resources and capacity building to address energy concerns.

MONTANA ENERGY CORPS AMERICORPS PROGRAM

Helping to address unmet community energy needs by providing hands-on energy assistance, promoting sustainable energy consumption and education, fostering community sustainability and helping to mitigate the effects of global climate change.

ENERGY CORPS ACTIVITIES

- × Weatherizing, winterizing and retrofitting low-income households
- × Conducting energy audits for low-income households and community facilities
- × Providing clean energy-related services designed to meet the needs of rural communities
- × Developing clean energy strategic planning networks within communities
- × Sustainable energy education and outreach
- × Greening of community facilities and programs

The Montana Energy Corps AmeriCorps project is an initiative of the National Center for Appropriate Technology (NCAT) in cooperation with The Corporation for National and Community Service that was created to address unmet community energy needs by promoting sustainable energy consumption and education, fostering community sustainability and helping to mitigate the effects of global climate change.

Energy Corps members are placed in host organizations in communities throughout the state of Montana to implement solutions for sustainable energy consumption.

Montana Energy Corps has three project goals:

Hands-On Energy Assistance: Montana Energy Corps members provide hands-on energy efficiency and alternative energy assistance to underserved Montana communities and groups.

Energy Education and Outreach: Energy Corps members create energy awareness through education and outreach activities to those groups and communities most

The Montana Energy Corps Project is operated by the National Center for Appropriate Technology (NCAT). NCAT is a 501(c)(3) nonprofit organization

that aims to improve the lives of economically disadvantaged people by helping individuals and communities adopt technologies that save energy and resources. » [read more](#)
